THE BEST OF ALL WORLDS

MID-LEVEL PRICING.  HIGH-END AMENITIES.  SUNNYBROOK QUALITY.
Brookside fifth-wheel and travel trailers are unique in that they combine comfort features and amenities more common to RVs costing much more, with SunnyBrook RV’s great reputation for solid value and quality of construction. You are sure to benefit from years of enjoyment as you travel in luxury. And travel with peace of mind knowing a Brookside, by SunnyBrook RV, will hold up down the road. We offer elegant fabrics and color choices, a wide variety of floorplans and, best of all, unsurpassed standard features unique to a Brookside.
The photograph at the top of this page shows just how large and luxurious a Brookside interior is. From its standard stain-resistant Marquesa® fabrics, to solid wood cabinetry and extra tall interior slideout height; Brookside has it all. Bathrooms feature standard Porcelain toilets and tub shower surround. Bedrooms are spacious and feature a true Queen-sized bed along with quality bedspread and valances with curtains. Your elegant Brookside interiors are built on 5/8” exterior grade plywood decking and I-beam frame—best in the industry!
Model 299 FWBHS shown in Contemporary.

Extra large storage and radiused baggage doors are standards.

Residential-style countertops and pull-out faucet are standard.

Other brands come with cheap plastic toilets. Not a Brookside. We offer standard porcelain foot-flush toilets.

This aluminum tread plate (ATP) front stonguard is standard on travel trailer models. It looks great while keeping road debris down.

Dual 30 lb. LP tanks are standard in this slider compartment. Brookside offers many convenience features others ignore.

Standard gelcoat exterior sidewalls make a Brookside look better and radiused 30" entry door and windows are high-end as well.
**CONSTRUCTION**

With a Brookside, you'll find that our aluminum Superstructure is stronger, tows easier and will look better longer than others on the market today. You will also get a higher return on your investment than any of the want-to-be aluminum units on the market.

SunnyBrook RV set the standard high. That's why we created and developed this aluminum-framed construction. Our ultra-light structure means a smoother ride, less fuel consumption, and a stronger body. Other brands either use minimal aluminum framing or an inexpensive, complete wood structure. Of course, if you look closer, it's easy to see that they use far less aluminum and structural support. SunnyBrook RV pioneered the aluminum Superstructure over 10 years ago because they care about quality. If you’re looking for the best built trailers, see what's under the surface on a Brookside.

* This comparison is to “other” competitors in same category. Competitive models and features may vary.

---

Heated and enclosed holding tanks (60 gallon fresh!) along with ducted floor heat, and solid steel I beam frame are first class!

Beefy, six-lug hubs and Super Lube axles are standard. A Brookside unit is built better and easier to maintain than others.

Real, poplar hardwood (vs. cheap yellow pine) is screwed together to provide the best cabinetry. We use Lumber Core cabinet stiles too.

Your Brookside is built better. R7 insulation and a full walk-on and rubber roof are more proof. Check out our aluminum superstructure!
